My only knock on the little i have seen so far is the recommendation to use the Insert Function on the formulas tab to build the formulas. This is just my opinion but i believe this is a bad habit to get into as it takes longer to build formulas this way and you are limited as to what you can put in, especially when nesting formulas.

Excel Dashboards and Data Analysis Masterclass | Udemy

Dashboards often provide at-a-glance views of key performance indicators (KPIs) relevant to a particular objective or business process. In the other, "dashboard" has another name for "progress report" or "report." The "dashboard" is often displayed on a web page which is linked to a database that allows the report to be constantly updated.
