Riboflavin, also known as vitamin B 2, is a vitamin found in food and used as a dietary supplement. Food sources include eggs, green vegetables, milk and other dairy product, meat, mushrooms, and almonds. Some countries require its addition to grains. As a supplement it is used to prevent and treat riboflavin deficiency and prevent migraines. It may be given by mouth or injection.

**Riboflavin - Wikipedia**

The H1B Visa Program is the official and primary USA "work: visa / work permit. The US Government offers the H1B visa to enable highly skilled International Workers and International Students, from all over the World, or already in the USA, the opportunity to legally live and work in America.

**USA Work Visa Guides and Employment Resources**

I was looking for the same thing, and I found this question. Thank you for asking it! However, I found that the answers I see here don't seem to quite give the answer you asked for (or that I was looking for) -- they seem to give the G commit, instead of the A commit.. So, I've created the following tree (letters assigned in chronological order), so I could test things out:

**Finding a branch point with Git? - Stack Overflow**

Test users may find the Council of Europe's Common European Framework of Reference for Languages (CEFR) helpful. The framework is a series of descriptions of abilities at different learning levels that can be applied to any language.
