As shown in Table 1, the most-often used theories in the areas reviewed are SCT, the TTM/stages of change, the HBM, the TPB, and the PRECEDE/PROCEED planning model. These findings are similar to those in general reviews of the literature (above) and show that a small number of theories are being used to develop and test interventions.

The Role of Behavioral Science Theory in Development and ...

INTRODUCTION. Dietary pattern is among the most fundamentally important of health influences (46, 54, 60-62, 81, 139, 145). The full scope of health effects, both good and bad, attributable to all variations on the theme of dietary pattern defies calculation because of the complexities of the causal pathway.

1 Webographics are attitudinal variables thought to account for the differences between people who do surveys online and those who do not. They generally measure lifestyles issues such as the types of activities people engage and their frequency, media use, attitudes toward privacy, and openness to innovation.
