British anthropologist Mary Douglas (1973) proposed a two-dimensional ordering of ways of looking at the world: 1. 'Group' or inclusion - the claim of groups over members, and 2. 'Grid' or classification - the degree to which interaction is subject to rules. Douglas saw these categories as relating to a wide variety of beliefs and social actions:

It shouldn't be either because that defines STR3 to be the preprocessing token STR1STR2. And passing args to another macro function doesn't help, because string literals can't be pasted together -- "s""1" is not a valid token.

### **C/C++ macro string concatenation - Stack Overflow**

A not always very easy to read, but practical copy & paste format has been chosen throughout this manual. In this format all commands are represented in code boxes, where the comments are given in blue color. To save space, often several commands are concatenated on one line and separated with a semicolon ';
