Marine biology is the scientific study of marine life, organisms in the sea. Given that in biology many phyla, families and genera have some species that live in the sea and others that live on land, marine biology classifies species based on the environment rather than on taxonomy.. A large proportion of all life on Earth lives in the ocean. The exact size of this large proportion is unknown

Nymph Biology Mayfly nymphs or "naiads (Naiad: Naiad is the technical term for nymph used by modern entomologists.)" grow underwater for a period ranging from 3 months to 2 years, depending on the species. Like the stoneflies of Plecoptera, their development follows "incomplete" metamorphosis, meaning they do not undergo a dramatic transformation to adulthood via a pupal stage like butterflies ...

SOIL PROFILE. The ground is modified and enriched by the plants growing on it. Making a section of soil (figure 4), you can observe different layers: a layer rich in organic matter, the humus (O); a layer rich in roots and living organisms (A); a layer less rich in life, but still used by roots (B) and an inert soil (C).

Science Experiments on Environmental Education and Biology

A not always very easy to read, but practical copy & paste format has been chosen throughout this manual. In this format all commands are represented in code boxes, where the comments are given in blue color. To save space, often several commands are concatenated on one line and separated with a semicolon ';

DNA, short for deoxyribonucleic acid, is the molecule that contains the genetic code of organisms. This includes animals, plants, protists, archaea and bacteria. DNA is in each cell in the organism and tells cells what proteins to make. Mostly, these proteins are enzymes. DNA is inherited by children from their parents. This is why children share traits with their parents, such as skin, hair ...

How to Identify Oak Leaves. With over sixty different oak species in the U.S alone and hundreds more across the globe, it can be challenging to identify oak leaves. To help narrow down a specific tree, they can be distinguished into two basic categories by leaf shape alone: red oaks and white oaks. Learning the...

Credits: 1. Prerequisite: Middle school biology and chemistry. Recommended: 9th or 10th Test Prep: CLEP Biology This course covers the basic material for this exam, but this is considered a very hard test, and I would suspect more will need to be studied to learn everything required for this huge exam. It's worth the same as two college courses which is why it covers so much.
