Hi Ganesh . VRF allows you to have seperate route tables. So an ISP can keep its customers seperate on a common infrastructure. VRF-Lite allows router to have different routes for a group of interfaces so department X can not route to department Y on the same router but both departments can share the connection to the cloud.

what is VRF - 13875 - The Cisco Learning Network

The following is a catalog of public facing Cisco Routing lab scenarios created by other authors that you can download here. These labs have been created for Cisco Packet Tracer but can be implmented on GNS3 or real hardware. I will be adding new routing labs as they become available so check back frequently to download the latest additions.
